

PACT

Powering America's Commercial Transportation

The voice for zero-emission vehicle infrastructure

The Challenge

Zero-emission vehicles (ZEVs) are the future of commercial transportation but inadequate utility infrastructure, long lead-times, supply chain bottlenecks, and state and local regulatory hurdles threaten to slow the transition of medium- and heavy-duty (M/HD)* vehicles at scale.

Our Goal

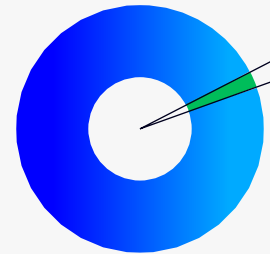

To accelerate the delivery of reliable nationwide infrastructure for M/HD ZEVs.

Why PACT?

ZEV stakeholders continue to commit resources and are invested in a net-zero transportation future, but misalignment exists between the demands of M/HD ZEVs and current level of infrastructure preparedness to enable an affordable energy transition. The purpose of Powering America's Commercial Transportation (PACT) is to bring visibility to the unique needs of M/HD ZEVs and work across sectors to accelerate access to ZEV infrastructure to power America's commercial fleets.

M/HD ZEV deployments currently outpace infrastructure readiness—we're focused on closing this gap

60,000 public charging stations for light-duty ZEVs

Less than 10 support Class 8 ZEVs²

Building ZEV infrastructure takes time³—our goal is to speed it up

1-2 Years

Securing construction permits

3-5 Years

Distribution capacity upgrades

7-10 Years

Building new substations

10+ Years

Transmission system upgrades

* M/HD refers to Class 6 - Class 8 vehicles, according to the Federal Highway Administration <https://afdc.energy.gov/data/10381>

² https://afdc.energy.gov/stations/#/analyze?country=US&fuel=ELEC&ev_levels=all
³ <https://efiling.energy.ca.gov/GetDocument.aspx?tn=250051&DocumentContentId=84769>

How PACT Will Accelerate ZEV Infrastructure Deployments:

- 1 Convene:** Bring together cross-sector stakeholders whose operations would benefit from a streamlined approach to deploying ZEV infrastructure
- 2 Educate:** Advise stakeholders about the state of ZEV infrastructure deployments and champion creative, collaborative and efficient solutions
- 3 Advocate:** Push for policies, regulations, and funding that support the swift deployment of reliable ZEV infrastructure for commercial-scale fleets, without unreasonable impacts on fleet operators, utility customers, and the health of the U.S. economy
- 4 Communicate:** Promote best practices to launch and execute commercial ZEV infrastructure projects

Who We Are

Our members share a common interest in accelerating deployment and access to ZEV infrastructure for commercial vehicle use. We are committed to promoting productive cross-sector collaboration and advancing policies, regulations, and access to resources that empower medium- and heavy-duty fleets to adopt ZEVs and achieve their decarbonization goals.

Why Join?

- ✓ Collaborate with individuals and organizations across stakeholder sectors
- ✓ Inform policy discussions with state, local, and federal decision-makers
- ✓ Share experience and insights to inform advocacy efforts
- ✓ Create a unique voice for M/HD infrastructure advocates
